Once Upon a time the Egyptian Boy Adam went to his school as usual, and when he

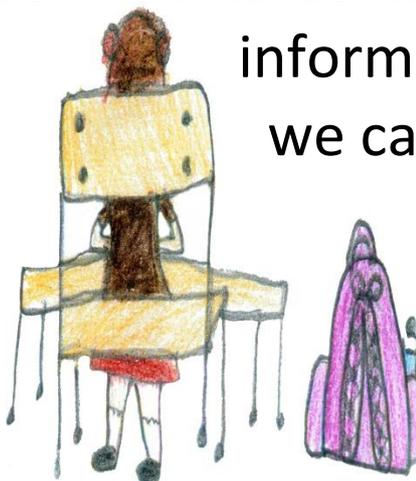

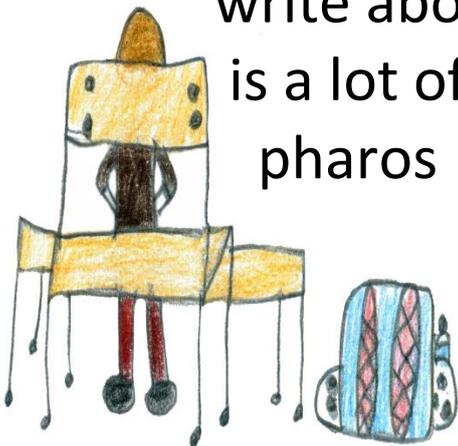

attended the class of history the teacher miss Dalia asked all pupils.. Miss Dalia: Attention please, I want

all of you to do a research about Pharos.

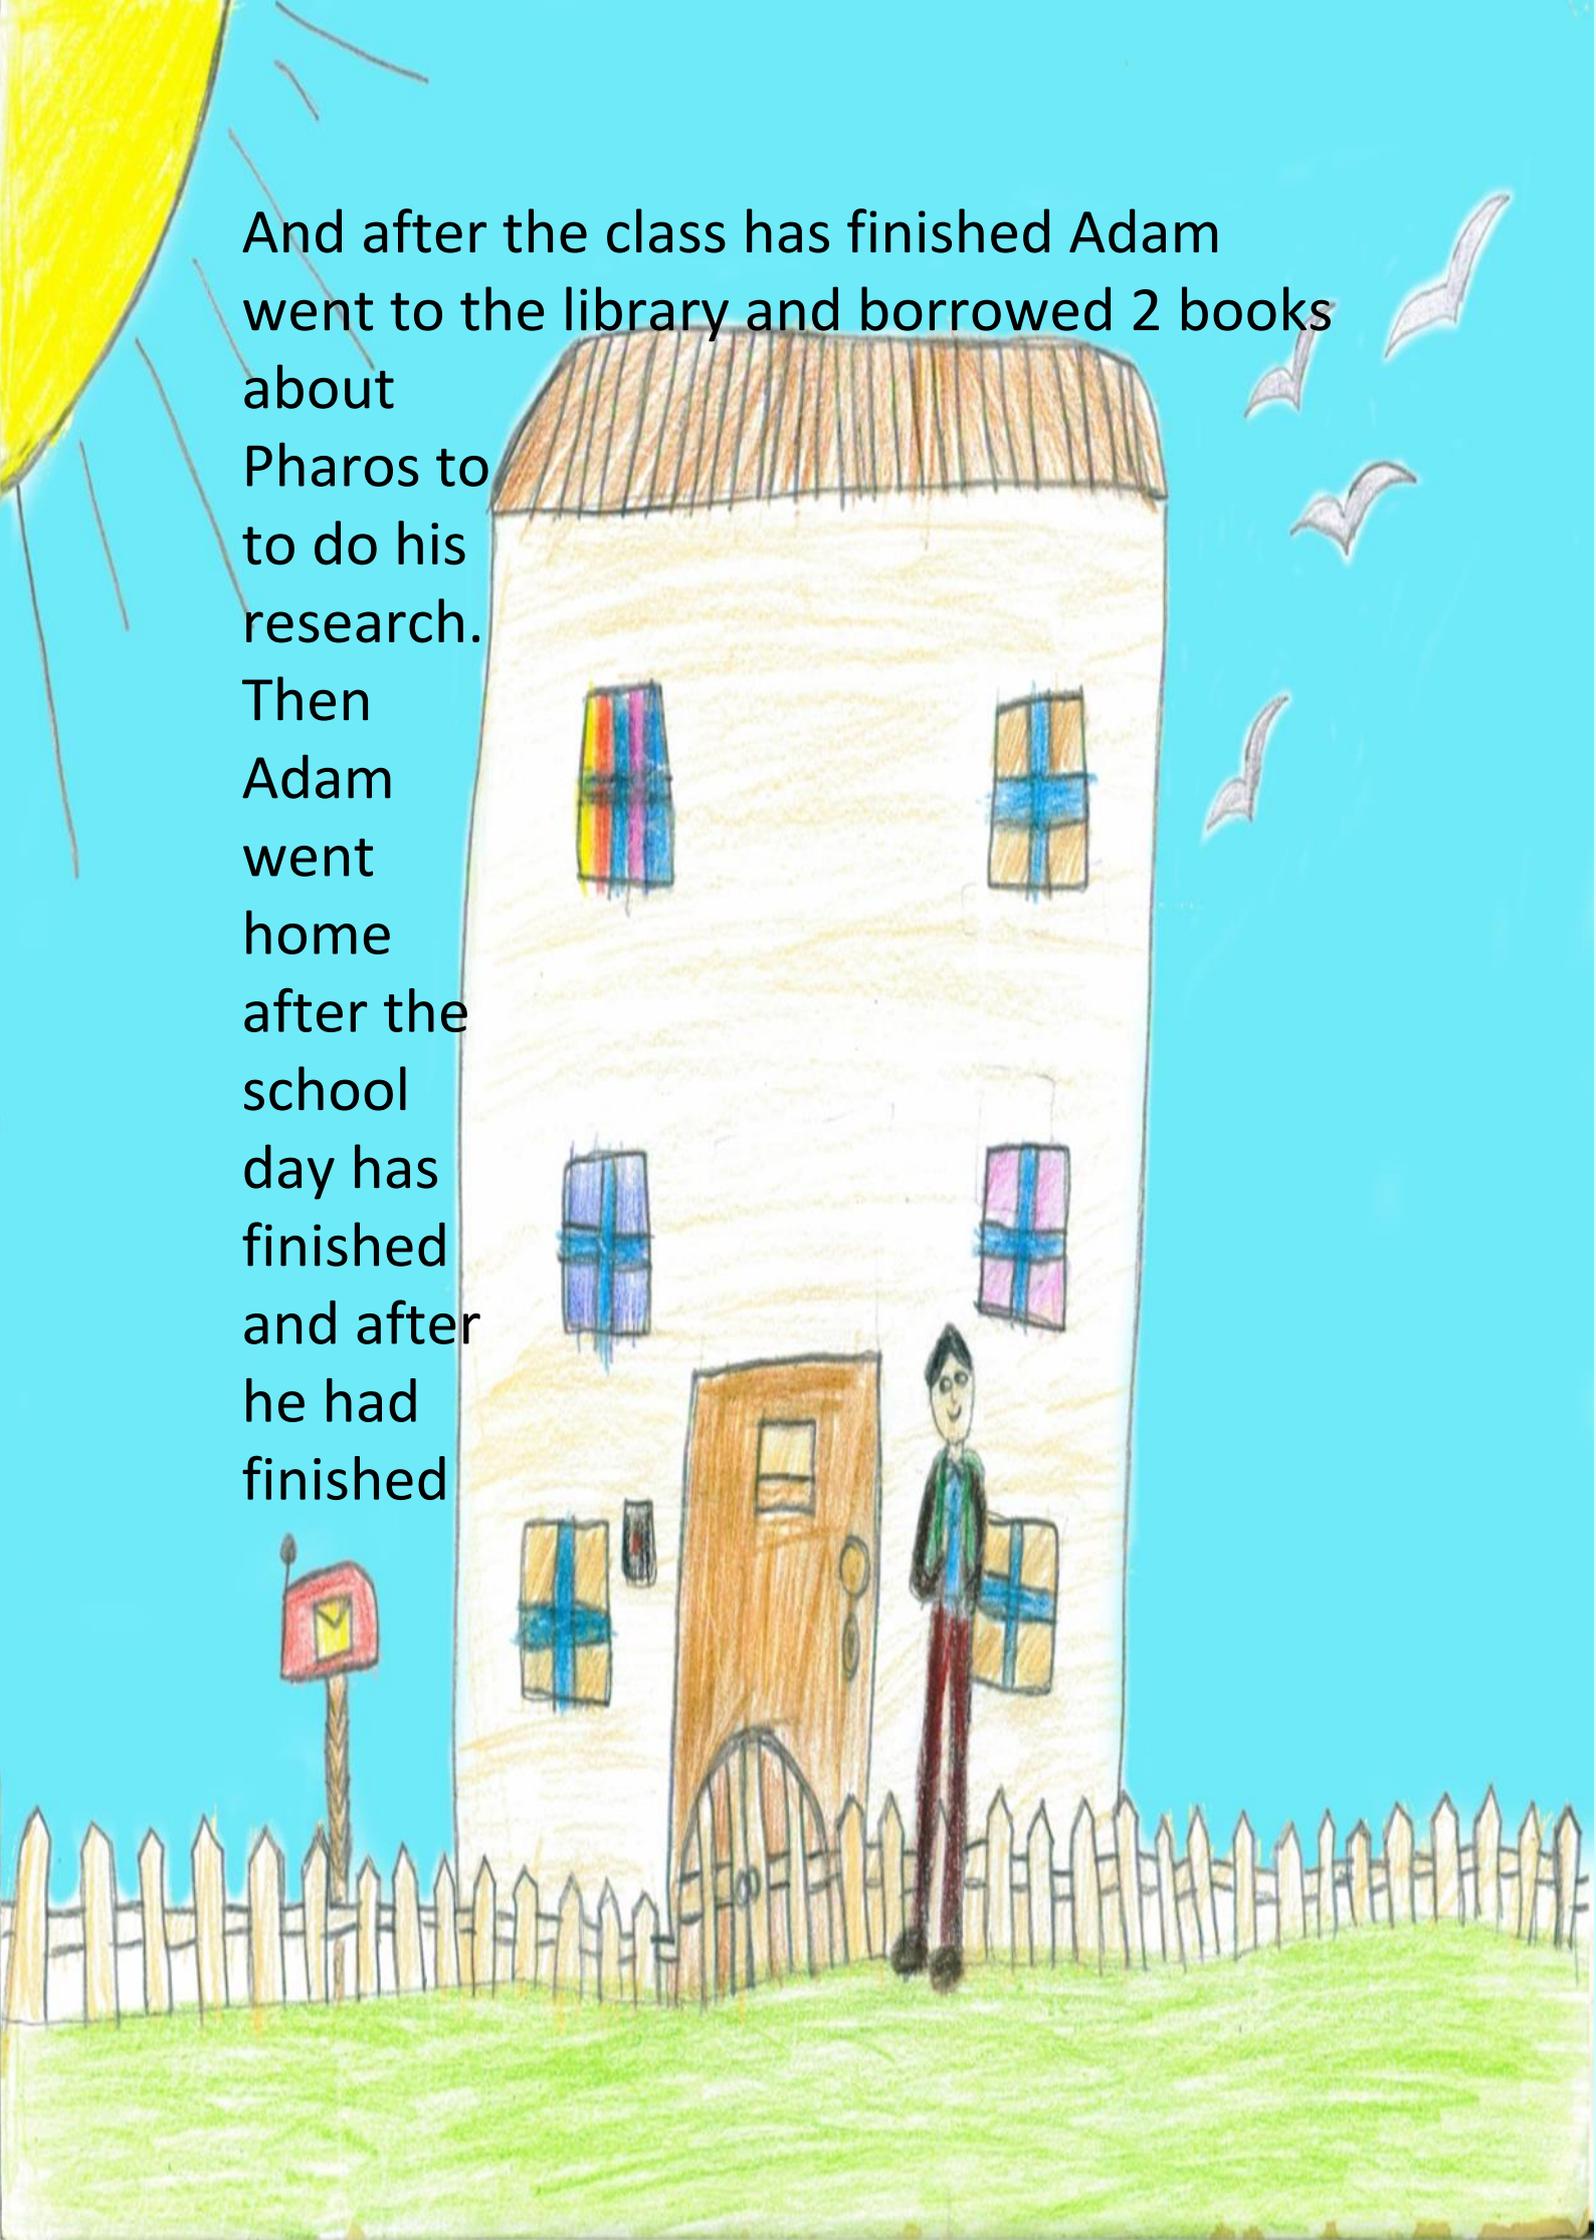

Adam: What exactly do you want us to write about Pharos miss Dalia, there is a lot of information about pharos we can gather?

Miss Dalia: Anything and everything
Adam, Any information you can gather
About Pharos will be very useful but of
course you will write it in an organized
way and don't forget to put pictures in
your research it's very important guys.

And after the class has finished Adam went to the library and borrowed 2 books about Pharos to do his research. Then Adam went home after the school day has finished and after he had finished

his lunch he started to read The 2 books that he had borrowed from the library and also he started to surf the net to gather other data about pharos.

Then Adam started to do his research and he put many pictures in it as his teacher asked him to do then finally he finished it.

Next day Adam went to his school to present his research to Miss Dalia and in his way he found very strange things, he found all civilized appearances had been disappeared the road covered with sand instead of asphalt and all buildings had disappeared and people were wearing pharos clothes instead of normal clothes, so Adam was very astonished and then he stopped a man who was wearing also pharos clothes and was looking at him in a strange way and he said

Adam: I beg your pardon sir, why are wearing like this?

The Man: What???

Adam: I mean why all people are wearing like you?

The Man: I don't understand you kid, what are saying and what do you want and why are you wearing like this?

Adam: Sir, where are we exactly?

The Man: we are in Taiba

What!!!!Taiba, do you mean we that are in Egypt????

The Man: of course, but why are you wearing like this?

Adam: What happened to Egypt? I don't understand anything, did we return back in age or Pharos are back....Impossible Pharos are back!!!!!!!!!!

The Man: I don't understand anything why are you wearing like this?? Oh stanger!! I will take you to the king you make me feel worry.

Adam: King
!!!! What king?

No No No

I...I was just kidding sir bye.... and suddenly Adam ran then he kept running and running until he found himself in an agriculture land full of flowers and crops and people who were wearing pharos clothes and they were planting the land then he said to himself

Adam: Actually I had read that pharos were planting using immersion irrigation and they made canal incision and they built the bridges to stop the flood.

Then Adam walked to see people making jewelries in a very technical and precious way so Adam said to himself

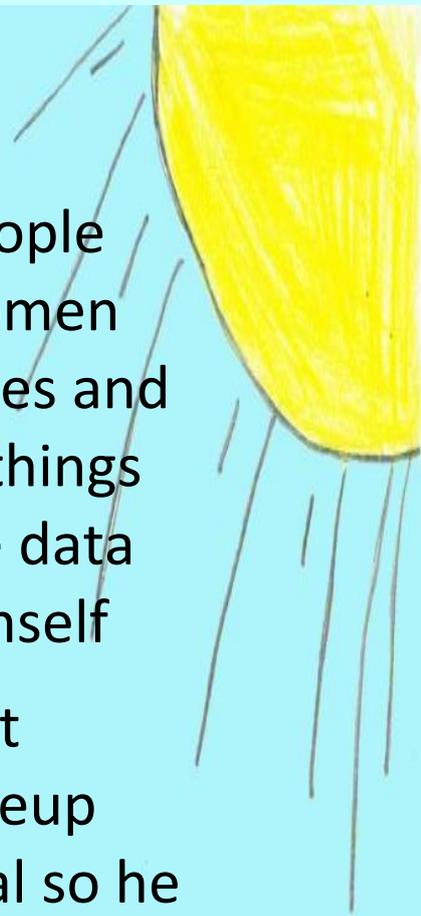

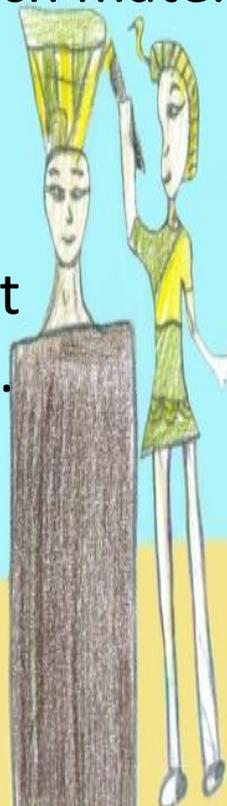

Adam: Oh dear how did Pharos succeeded to make these tiny beautiful jewelries and how did these jewelries kept their beautiful colors along all these seven thousand years, I also read that they were the first people who had extracted gold from the mountains of the red sea and the city of Nubba.

Then Adam walked to see other people who were making cosmetics for women like kohl, lipstick, blush and perfumes and he was astonished to see all these things because he didn't read about these data in his research, so Adam said to himself

Adam: Oh my God, cosmetics I can't believe my eyes I thought that makeup was just in their drawings not in real so he decided to ask the man who was selling makeup.

Adam: If you please, how do you make lipstick and blush, I Mean which material do you use?

The Man:
From animal
Fats and plant
oils and paints.

Then Adam said to himself: Wow!!! But that also means that these cosmetics are very natural and they can't be harmful, great!!

Then a woman who was also buying makeup told Adam: And for much better results the woman should prepare her skin first before putting cosmetics.

So Adam said: What!!!! How madam?

The woman: the woman should scrub her face using special salts or put milk on it then rinse it with water.

Then Adam said: And from which material do you make these perfumes?

The Woman: Kyphi is one of the most famous perfumes and it is made of frankincense, myrrh, mastic, pine resin, cinnamon, cardamom, saffron, juniper, mint, other herbs and spices.

Then Adam left them and he was still astonished from what he saw and heard then he found people who were building different houses and he told himself

Adam: Why are not all houses the same?

Then he asked this question to a builder
The Builder: Sir, the houses of poor people are built from mud while the castles of rich people are built from limestone, sandstone, marble, alabaster and granite, also in some buildings we can use wood, minerals and glass.

So, Adam said to himself: Aaah.. now I remembered I read about that while doing my research however I couldn't imagine that buildings in real will be very great, pharos were just great in everything.

Then Adam thanked the man and went, and he saw builders building the three Pyramids and he said to himself

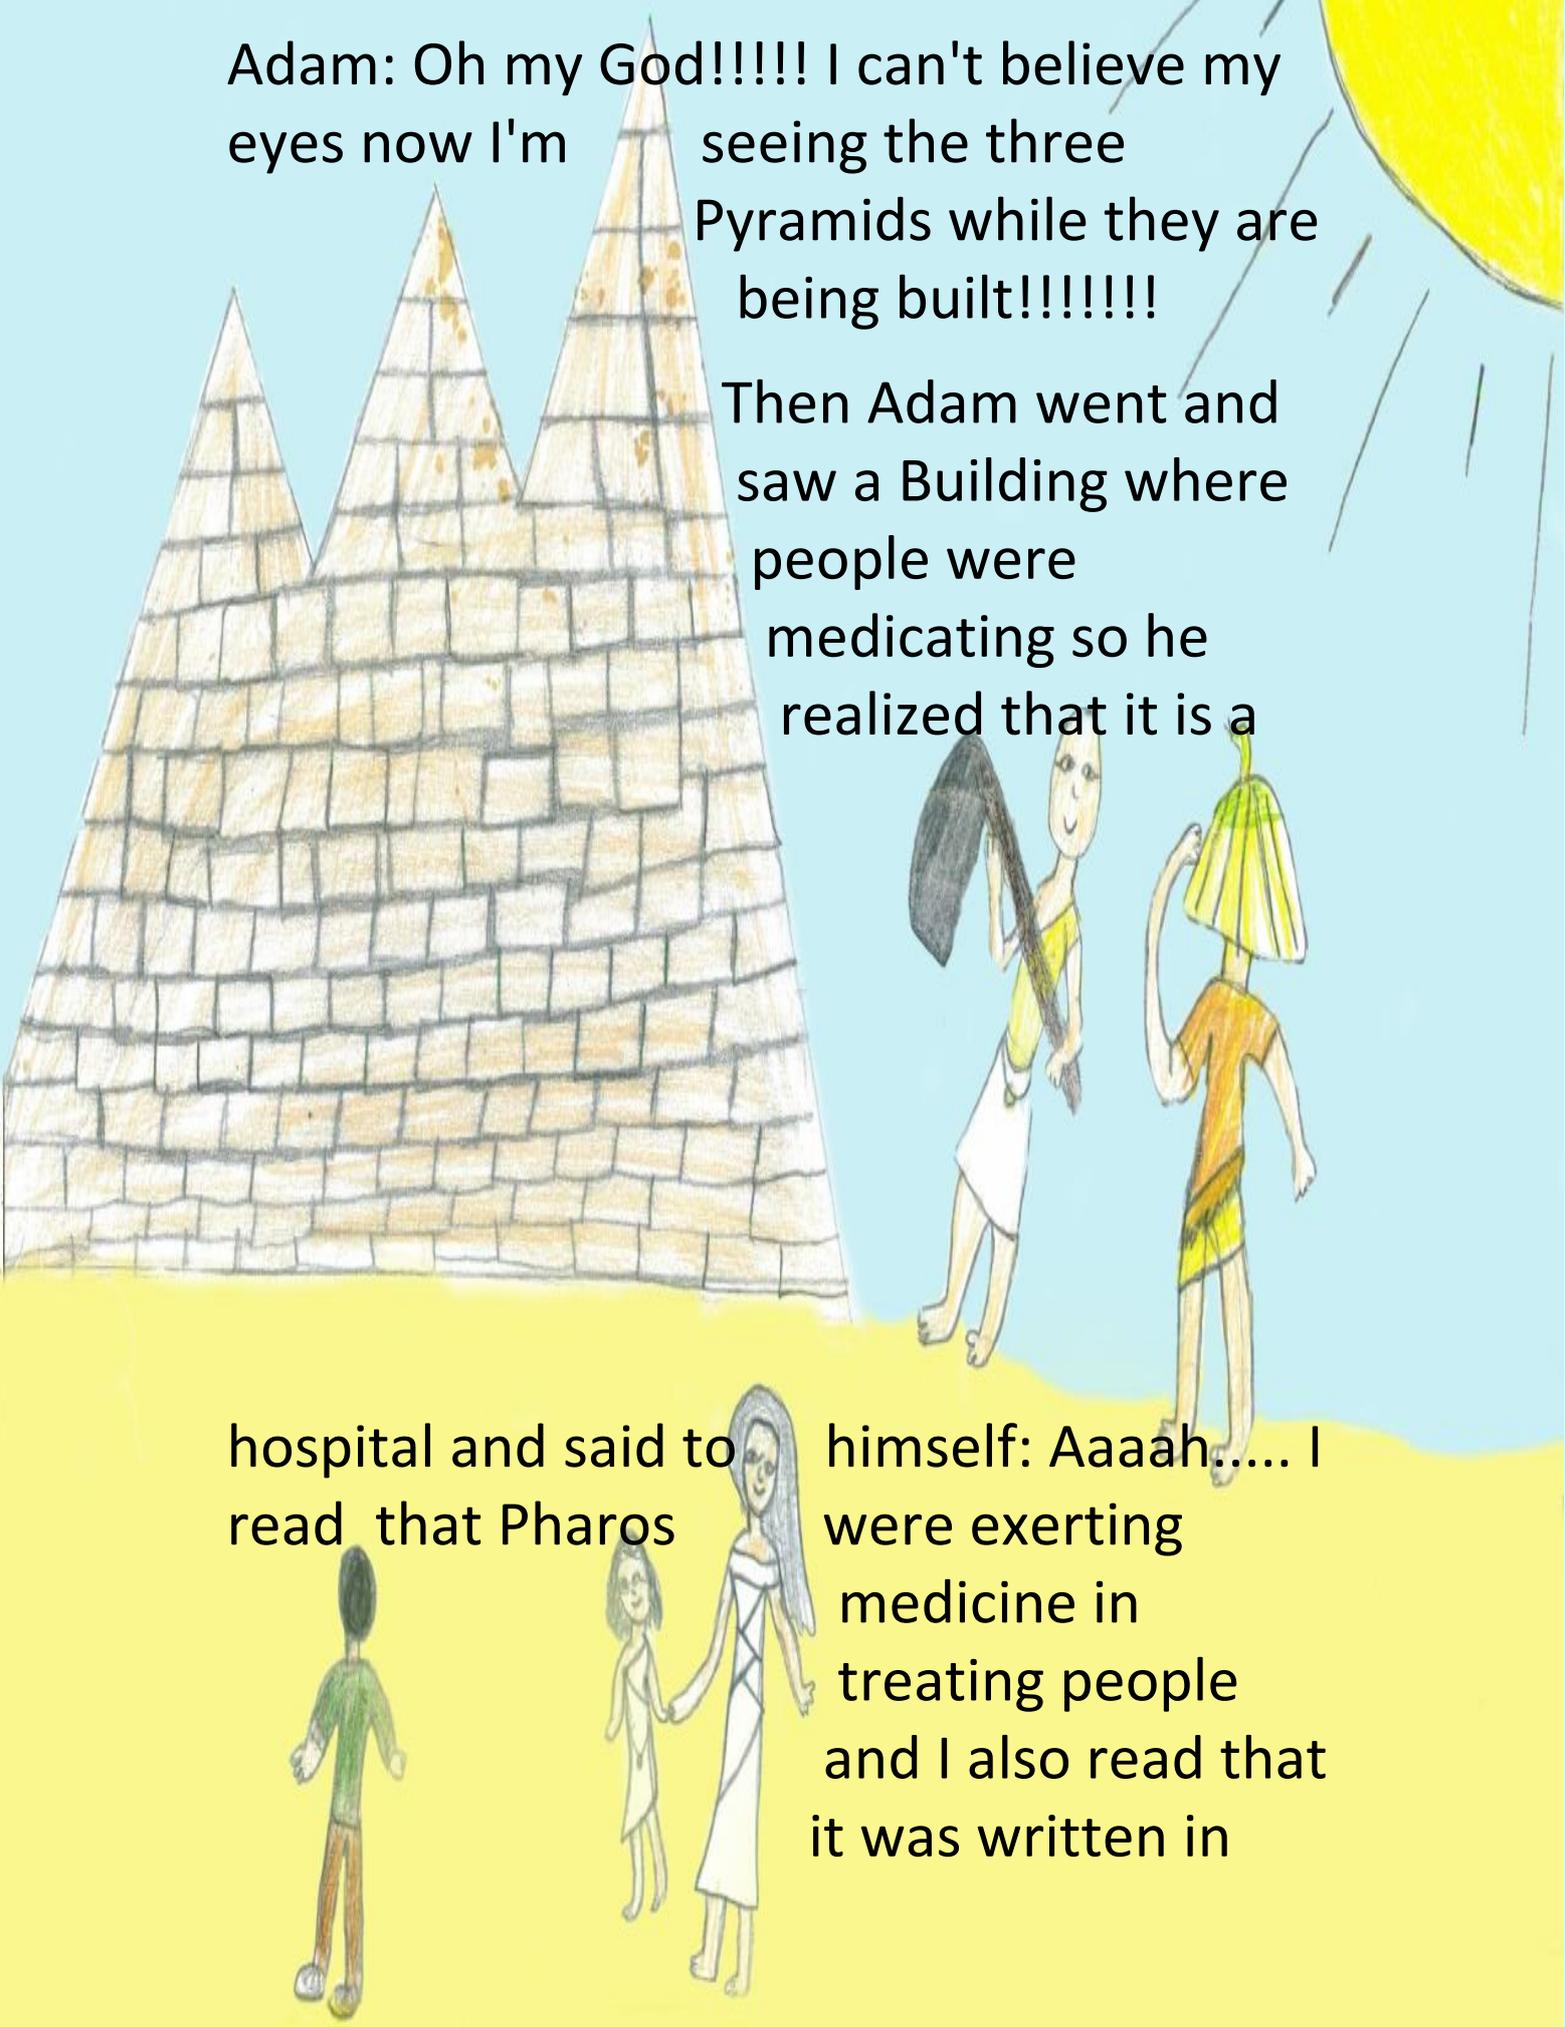

Adam: Oh my God!!!!!! I can't believe my eyes now I'm seeing the three Pyramids while they are being built!!!!!!!

Then Adam went and saw a Building where people were medicating so he realized that it is a

hospital and said to read that Pharos

himself: Aaaah..... I were exerting medicine in treating people and I also read that it was written in

Ancient Egyptian manuscripts that Amhotep who was one of the Ancient Egyptian Priests was the setter of Medicine in Ancient Egypt, and Pharos in latest centuries called him "God of Healing".

Then Adam asked a man who was working there, Adam: What are the tools that you use in treating sick people?

The Man: Scalpel, Knife, tweezers, pincer also we use the feather of gledge as an eyedrop, and we use incense as a remedy.

We treat wounds and fractures and we operate surgeries if its needed....

So Adam realized that this man is a doctor then he interrupted him

Adam: Surgeries?????How ????I mean how you operate these surgeries???

The Man: Of course, Im going now to operate a surgery to excise the tumor for a cancer patient and I have to go quickly....

Adam
again:
you treat
my God I
believe it....

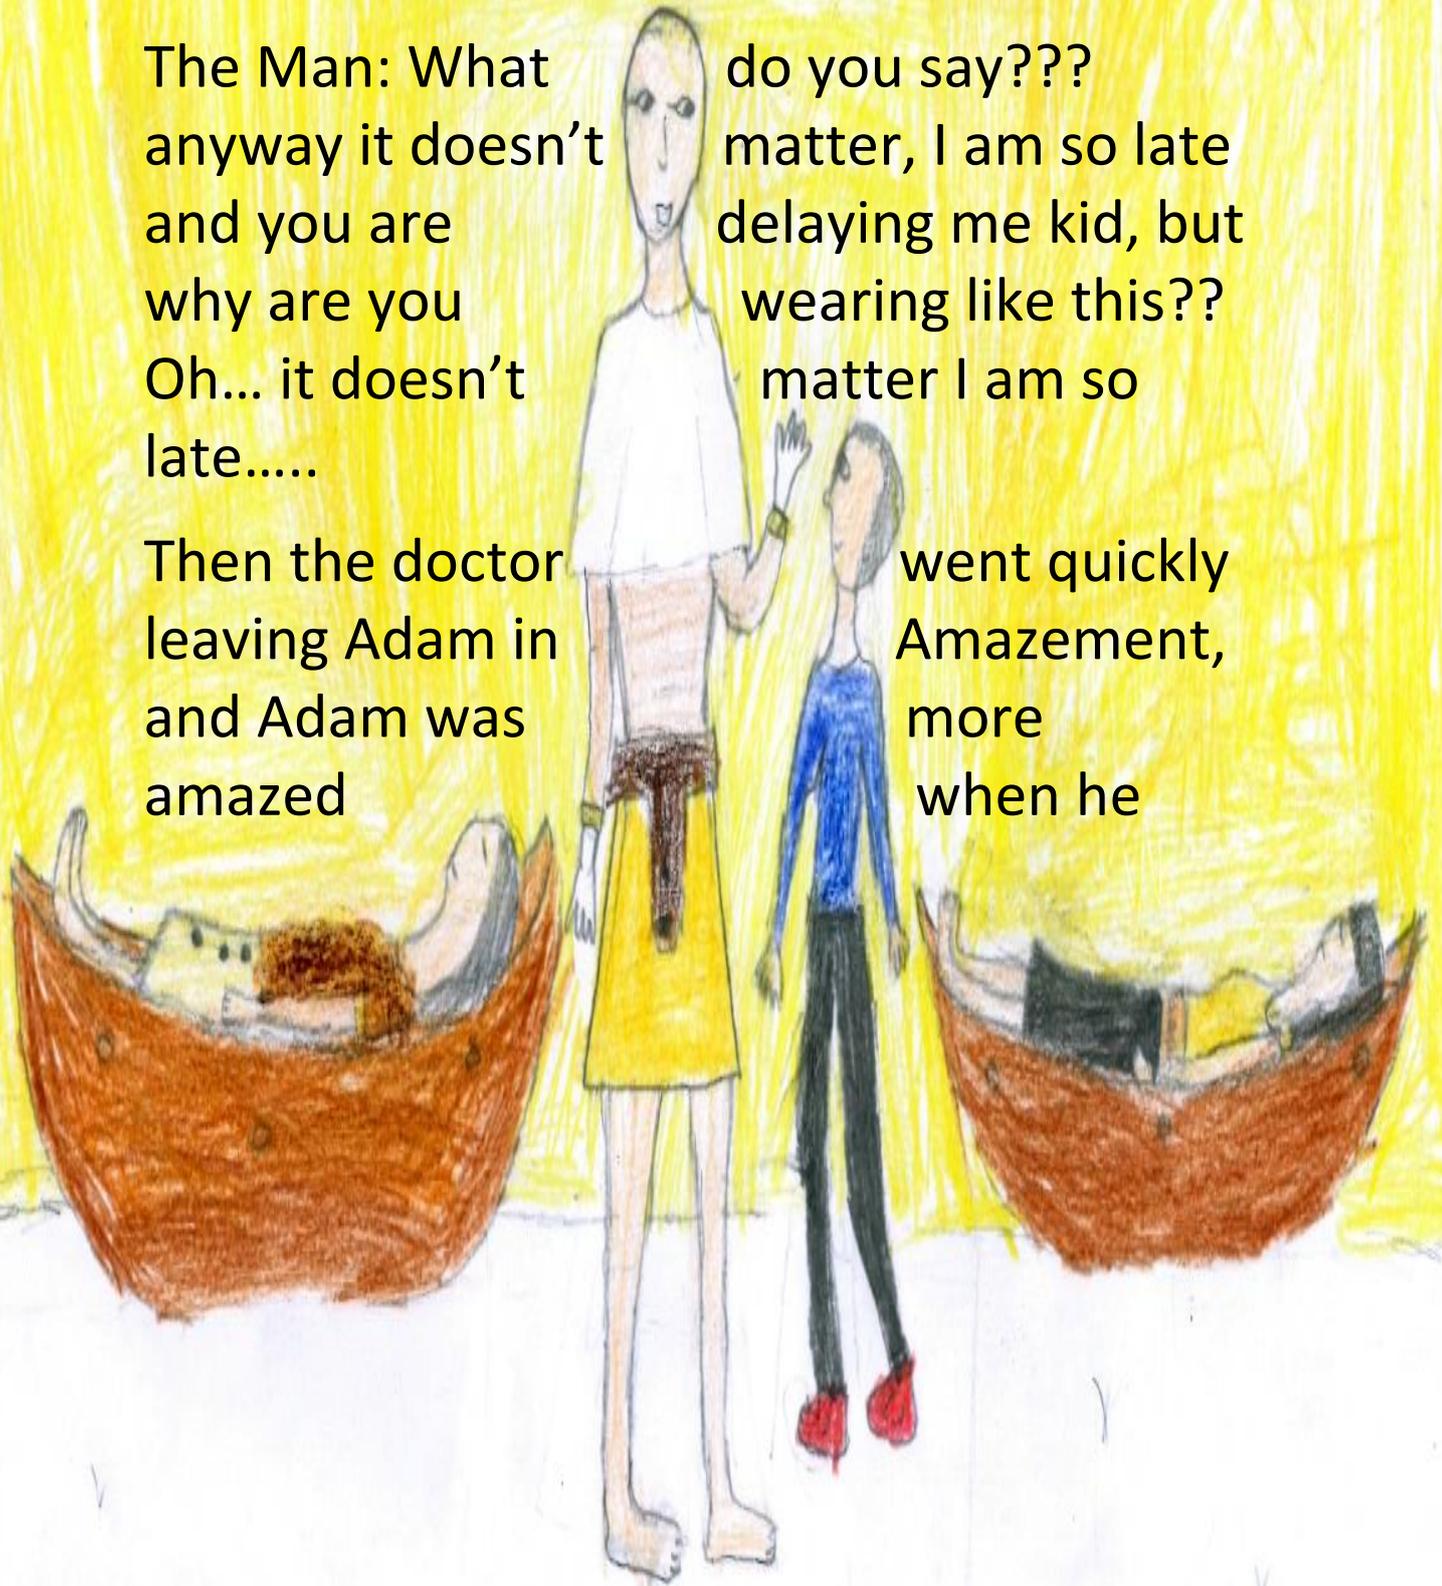

interrupted
Cancer!!!!
cancer, Oh
can't

The Man: What
anyway it doesn't
and you are
why are you
Oh... it doesn't
late.....

do you say???
matter, I am so late
delaying me kid, but
wearing like this??
matter I am so

Then the doctor
leaving Adam in
and Adam was
amazed

went quickly
Amazement,
more
when he

peered out to see the mummification to dead bodies using vegetarian aromatic materials which were cooked in a liquid and there was a piece of red linen that is put inside this liquid and this piece of linen is put on the face of the dead body.

And there Adam couldn't control himself and said

Adam: Nooooooooooooo, please get me out of here I feel among those people that I am nothing ...nothing can you here me...nothiiiiiiiiiiing.

Then Adam went out to see the most wondrous thing of all what he had seen before, he saw the place where Astronomies are studied, and he saw a man who was working in Astronomy and then he asked him

Adam: If you please sir, could you tell me exactly what are you doing?

The Man: We are here busy in the perpendicular of sun ray on king

Ramses(II) face and this even occurs only on 2 days in the year, one day is his birthday which is February 22 and the other day is his coronation day which is October 22, come in look, so Adam looked and was very astonished to see this incredible event which is still wondering all the whole world up till now, so Adam said

Adam: Aaaaah, I knew this magnificent info sir but would you tell me how could you achieve this gorgeous event? all people come yearly from everywhere to see it you had dazzled the whole world sir, so the man interrupted

The Man: World, which world do you mean kid? and why do you wear such funny things?and who are you?

So Adam was confused and pointed to his clothes and said

Adam: Funny things.... Funny things....what things sir???.I...I....I forgot an important appointment, see you later sir

Then Adam ran away till he crashed into the first man that he had seen in the beginning of his adventure

The Man in deception: Where are you going kid?

So Adam got scared and said

Adam:II....

So the man quickly interrupted him saying

The Man: Listen kid, Don't you ever lie to me, I am following you since morning, who are you?and what do you want?and where are you from?and why do you wear such funny clothes that I have never seen in my life? Answer...and don't you ever lie to me you heard me don't you ever lie to me otherwise I will take you to the King.

So Adam answered scarily

Adam: Sir, In fact I am stranger and I am not from this country and.....and.....

The man interrupted quickly

The Man: And you came to our country as a spy right, I know who sent you to spy on our country and..... so Adam interrupted quickly

Adam: No sir I swear I am not a spy I....I....I am from another age sir, so the man interrupted weirdly

The Man: Another Age!!!!Is there any other age other than the age that we live in, what are you saying kid are you kidding me or you lie on me or what exactly is your story....Answer???

then the man came more closer to Adam and pulled him from his clothes.

So Adam answered the man quickly

Adam: No sir I am not lying on you as well I am not kidding with you sir, actually I am from another age and I can proof what I am telling you sir, can you see.

Then Adam got out his Mobile phone and show it to the man and the man was very astonished and said to Adam

The Man: What is that?...What is that?....I have never seen such thing in my whole life..then the man took the mobile phone to see it weirdly, then the man asked Adam.

The Man: You didn't answer me kid, what is this and from where did you get it and who are you?

Adam: Sir I have told you before I am from another age and you didn't believe me and this is called Mobile phone people had invented it in order to call each other...

The Man quickly interrupted

The Man: Call each other...what you mean by call each other? so Adam answered

Adam: Look sir, Now I am here....

right??so the man kept silent so Adam repeated to him his question, so the man replied

The Man: Right, so Adam said

Adam: So, if I am here now with my mobile phone and another person having

his mobile phone in any other place, so he can call me and talk to me and I can hear him and talk to him also, so the man interrupted Adam weirdly saying.

The Man: You will talk to each other and you are not in the same place.

Adam: Yes sir, even if he was in another country, and that what distinguish this device, the man interrupted Adam saying.

The Man: device what do you mean by device???

Adam: I mean what I am holding now sir this is called a device, the man interrupted

The Man: Mobile phone or device

Adam(trying to hide his laugh): This device is called a mobile phone

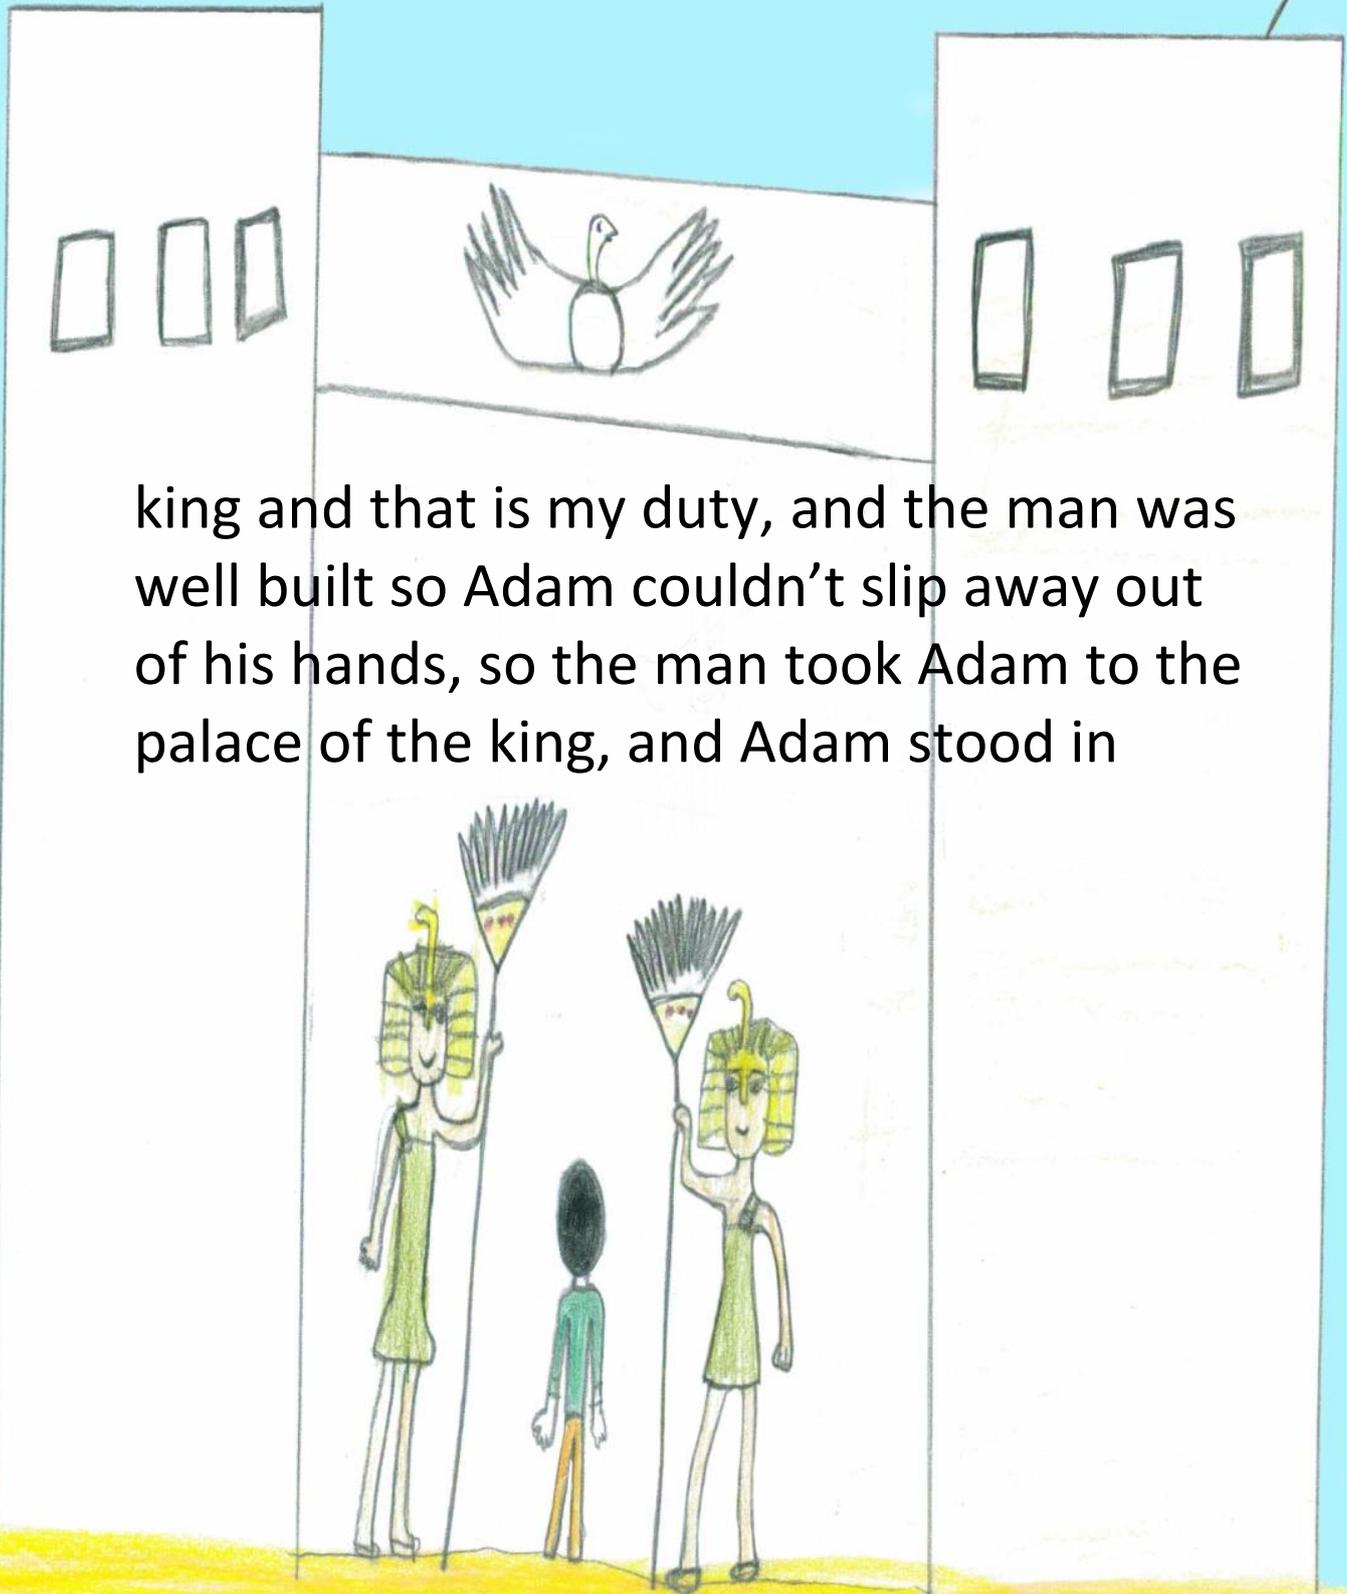

The Man: Any way, I don't believe you but I am astonished at this thing and at your clothes and at everything..I am..I

am..confused, I will take you to the king and he will handle this, you are a spy, then the man dragged Adam to take him to the king then Adam said

Adam: No ...No...Please sir leave me, let me run away ...I mean go away the man interrupted

The Man: No.... I work at the palace of the

king and that is my duty, and the man was well built so Adam couldn't slip away out of his hands, so the man took Adam to the palace of the king, and Adam stood in

front of the king scarily.

The King: What is that?

Then the man told everything to the king,
then the king said

The King: This kid is so wearied

The Man: Your majesty don't bother
yourself by his issue I suggest we kill him
and end this boring story.

Adam(looking to the man and
whispering): Go to hell

The Man: What are you saying kid?

Adam: Nothing sir then Adam looked at
the king saying

Adam: Your Majesty, I swear I am not a
spy, rather I came from another age
comes after your age by thousands of
years and I can tell you that your great
civilization will be lasting for seven
thousands years and will inspire the whole
world, then the king said

The King: And What is new I know that
our Civilization will inspire the whole
world!!!!!!

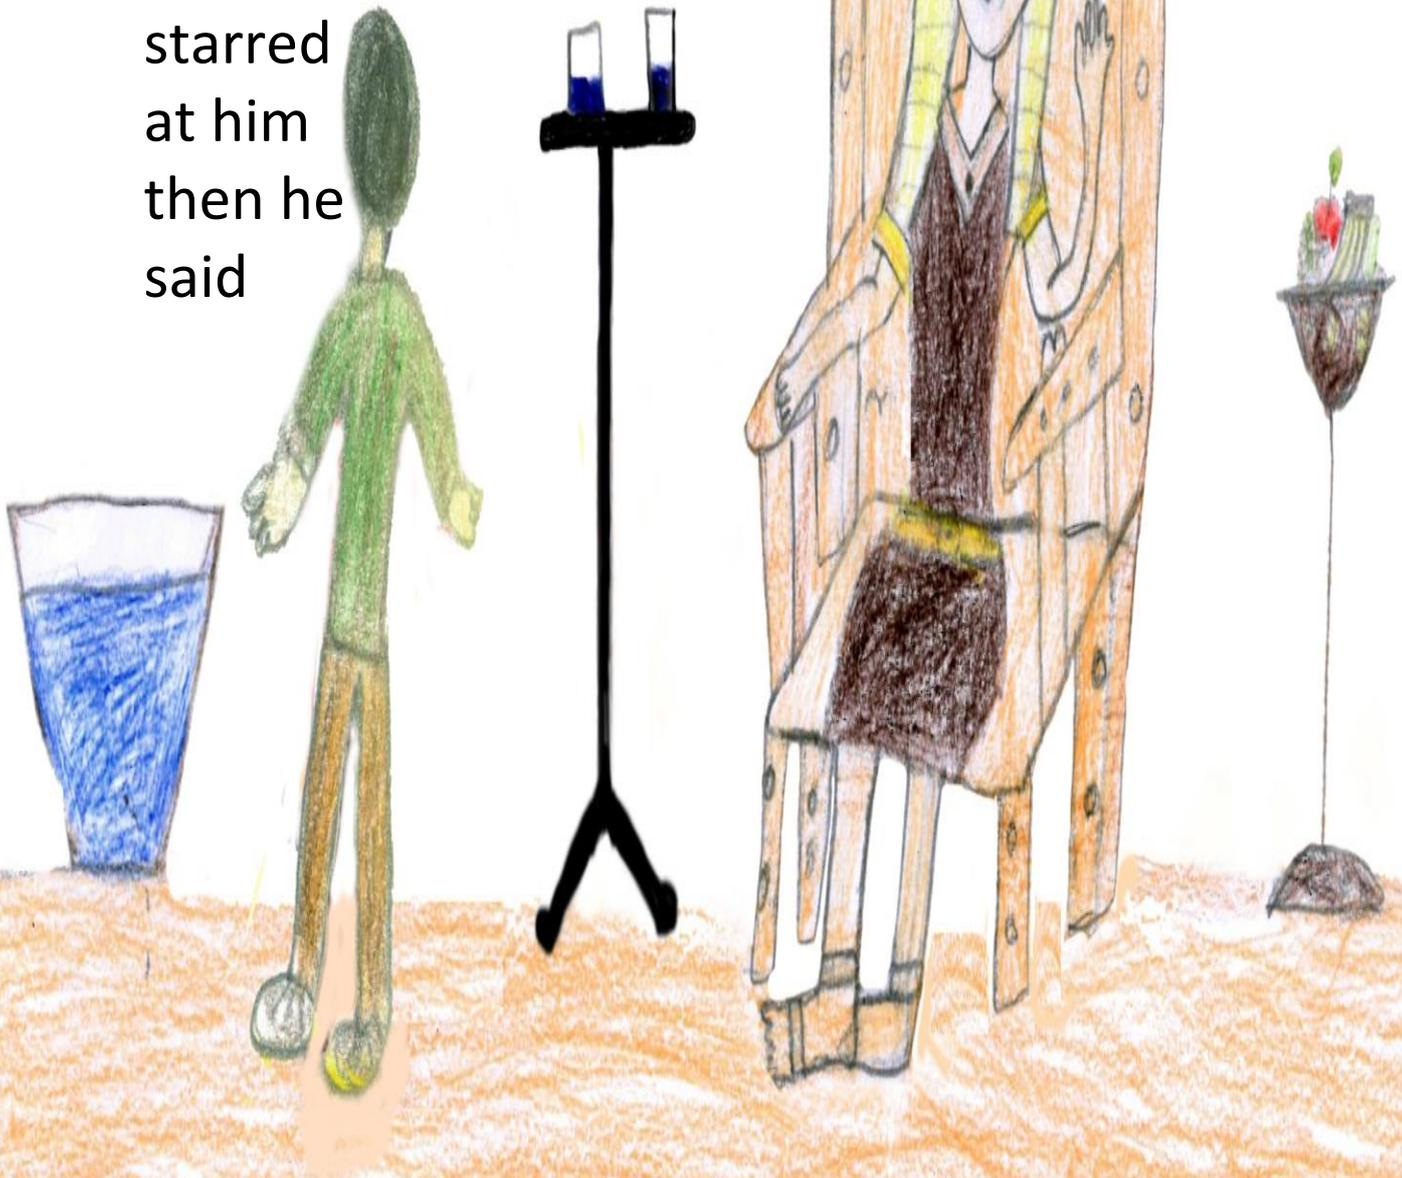

but What do you say?

Seven thousands years!!!!

Then the king came closer
towards Adam and

starred
at him

then he
said

The King: I began to feel that this kid is not a liar although all what he said is nonsense, but I don't know why do I believe him.

Adam: That's because I am really honest your majesty, then Adam started to show the mobile phone to the king and explain to him everything about it and the king is very dazzled of what he sees but he was trying to hide his expressions because of his prestige, then Adam started to tell the king many things about Computers, electric devices, cars, planes, submarines, rockets, robots and satellites and the king was listening to Adam carefully moreover he was asking Adam about all what the data that Adam had told him and Adam was answering him as far as he knows, then the king told Adam

The King: Listen kid, all what have you said is unbelievable, however I still believe you.

Adam: Thanks your Majesty

The King: But Do you know Adam the real meaning of the evolution that had been achieved in your age?

Adam: What does it mean your majesty?

The King: It means that people in your age don't want to work or even think, because all what had you explained to me from tech....tech...tech

Adam: Technology your majesty

The King: Yes, Yes this thing made tools to enhance human comfort and don't help him to do any effort in order to achieve what he wants, and the more the existence of these tools the more the laziness and stupidity of the people in your age.

Adam: Stupidity!!!!!!!How come, your majesty????? I had told you that we had made rockets and satellites.

The King: Yes, but Did you all invent these things??? only your scientists had invented them and the rest are living in prosperity of these tools and this resulted

in making those people more stupid and lazy moreover this thing which is called com...com...com...

Adam: Computer, your majesty

The King: Yes, Yes this thing thinks instead of the human and that enhanced your laziness and stupidity, however in our century people are challenging themselves in order to achieve what they want due to lackness of Tech...and Com...and the result was that we made miracles and we became imperishable till your age.

Adam(In sorrow): Do you mean your majesty that technology is a big fault in our age?

The King: In contrary Tec...is not a fault however your bad usage to it is the fault, I believe that human brain is more powerful than Tec...but you don't make use of it, So listen to me kid what you had achieved in your age cannot be

considered as civilization that's why you are not gonna be imperishable like us.

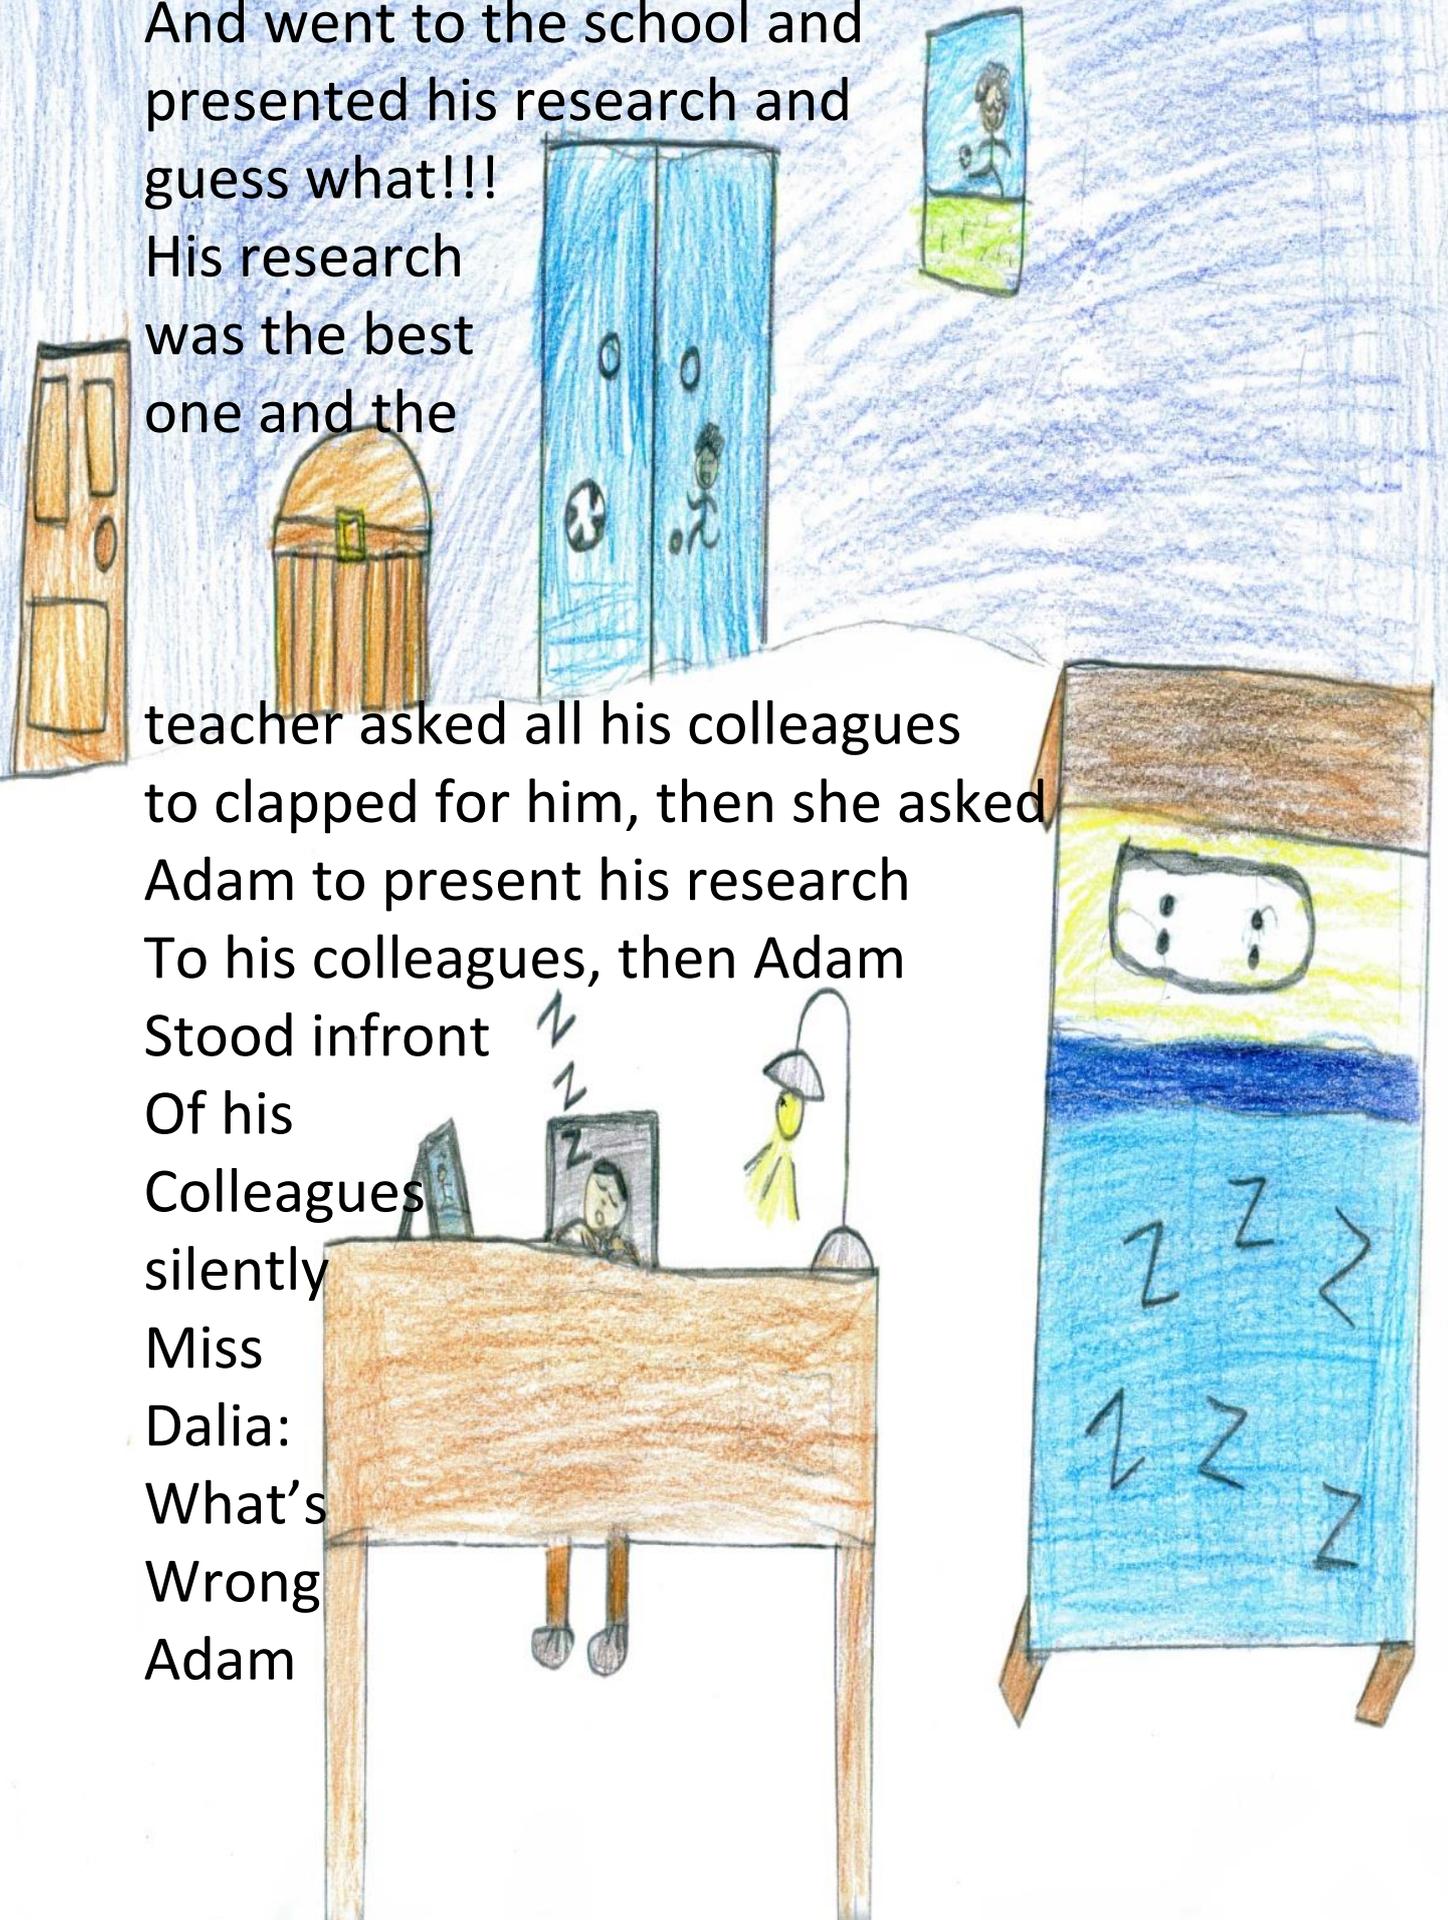

Adam(sadly): So what can you advise us your majesty?

The King: I advise you to make these tools serve you rather than serving it, and I can also tell you that if you didn't take your attention towards it, it will be the main cause of your destruction, then Adam said to himself.

Adam: You are absoooooooooolutely right, we really need to be careful before the destruction.....and also I.....I.....I need.....I need....to eat.....I am hungry....I am tired...I want.....I want to go.....I have to take some rest.....it was a long day.....I.....I.....

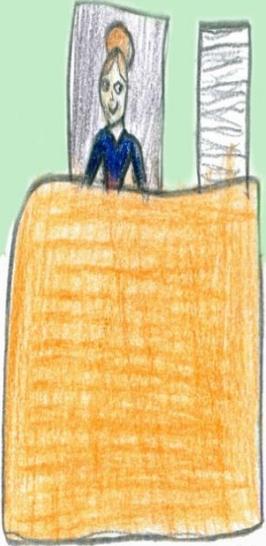

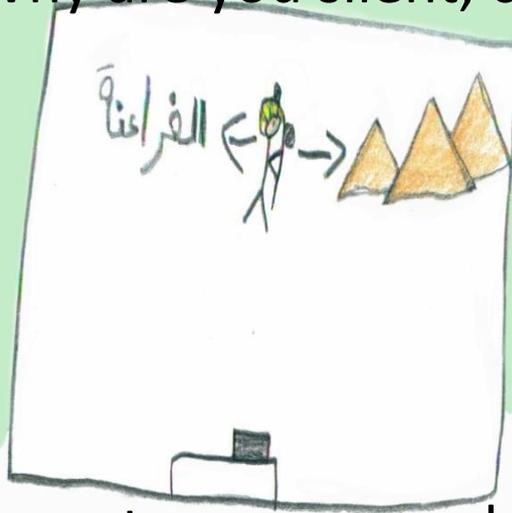

Then Adam woke up after a long dream
And went to the school and
presented his research and
guess what!!!
His research
was the best
one and the

teacher asked all his colleagues
to clapped for him, then she asked
Adam to present his research
To his colleagues, then Adam
Stood in front
Of his
Colleagues
silently
Miss
Dalia:
What's
Wrong
Adam

Why are you silent, come in..

present your research to your colleagues?
Adam: Miss Dalia...my colleagues...

all what can I say that we are so late, we should be careful before destruction comes.

The End

THE END
